

## **The Dyer's Assistant.** **Version 3**

*A complete, full-featured recipe management system for the dyehouse. Simple. Fast. Functional. Flexible.*

**Dye and auxiliary stocks management...** Full reporting capability tracks orders and deliveries, production usage, current levels, low stock warning, supplier reports, all with full audit integrity.

**Production recipe management...** Everything you need to manage and maintain your production recipes, standard dyeing methods. Features include calculations of auxiliaries by rules, report recipes by cost or customer or quality, replacement of dyes/auxiliaries, management of dyeing machines, customers and fabric qualities. Maintain recipes for standard exhaust, continuous, CPB, or a combination of dyeing techniques.

**Production worksheets...** much of the process of generating a worksheet for a bulked recipe is automated. The production worksheets are linked to your dye/auxiliary stocks to keep them up-to-date automatically. A dyeing performance for each recipe is maintained. Link to **WeighStation** for controlled weighing in the dye kitchen. All production information is stored and available for reporting.

A separate package for **Loose Stock** dyeing provides unique features for managing your production, from simple dyelots to complex jobs with up to 10 coloured fibres, and a mix of fibre types within each lot. Full reporting of job progress, fibre requirements etc.

**Production management reporting...** full suite of reporting functions to analyse your production by day, day range, month, year. Reporting by customer, dyeing method, dyeing machine, customer etc. The production reports are fast and accurate. Review your production graphically or as tables.
